PROFILE

Results-oriented DevOps and Software Engineer with hands-on experience in Docker containerization, Jenkins CI/CD automation, Nginx configuration, Linux administration, and production deployment of scalable web applications. Skilled in infrastructure management, deployment automation, environment configuration, release management, and maintaining high-availability Linux server environments. Experienced in continuous integration, continuous deployment, application monitoring, REST API integration, and cloud-based deployment workflows. Proficient in scalable systems deployment, Git/GitHub version control, and automation pipelines. Holds a PG Diploma in Big Data Analytics with knowledge of Python, Java, DBMS, cloud computing, and DevOps practices.

PROFESSIONAL EXPERIENCE

DvijTech Global Solutions, Software Engineer

06/2025 – Present | Pune, India

- Containerized and deployed scalable web applications using Docker, Jenkins CI/CD, and Nginx production workflows.
- Managed Linux administration, server environments, deployment configurations, and infrastructure management processes.
- Automated continuous integration and deployment workflows to improve release efficiency and deployment reliability.
- Configured environment setup, application monitoring, and production support across Linux hosting environments.

PROJECTS

VM App (Financial Web Application)

- Deployed financial applications using Docker, Jenkins CI/CD, Nginx, and Linux.
- Configured containerization, reverse proxy setup, and deployment workflows.
- Improved monitoring, infrastructure reliability, and system performance.

Hanson Scales Website

- Deployed industrial weighing platform using Docker, Jenkins CI/CD, Nginx, and Linux.
- Managed containerization, reverse proxy configuration, and deployment workflows.
- Optimized infrastructure, uptime, and server performance for scalability.

Travel Application

- Deployed web applications using Docker, Jenkins CI/CD, and Nginx.
- Managed Linux servers, monitoring, and deployment workflows for availability.
- Automated CI/CD pipelines for faster releases and reliable deployments.

DGIPR (Media Management Portal)

- Deployed production systems using Docker, Jenkins CI/CD, Nginx, and Linux.
- Managed deployment workflows, environment configuration, and production support.
- Automated release management, monitoring, and deployment pipelines.

PMPML Website (Public Transport Portal)

- Developed scalable transport portal with responsive architecture and optimized performance.
- Integrated REST APIs, maps, and real-time transport tracking features.
- Built reusable frontend modules with scalable deployment-ready architecture.

Shivkrupa Website (Company Portal)

- Developed responsive corporate portal with reusable components and scalable architecture.
- Implemented optimized rendering and performance-focused workflows.
- Deployed production-ready applications with responsive accessibility optimization.

Grampanchayat Website (Government Portal)

- Developed multilingual government portal with scalable frontend architecture.
- Integrated search services, maps, automated emails, and responsive features.
- Improved performance using lazy loading and code splitting.

Vedant IT Solutions Website (Corporate Web Portal)

- Developed responsive business website with reusable UI components and workflows.
- Integrated communication services and scalable application workflows.
- Optimized frontend architecture, loading speed, and deployment performance.

EDUCATION

PG Diploma in Big Data Analytics,

CDAC Kharghar, Navi Mumbai

03/2024 – 08/2024 | Mumbai, India

B.TECH,

MBES College of Engineering, Ambajogai

07/2019 – 06/2023 | Ambajogai, India

SKILLS

- **DevOps & Cloud** — Docker, Jenkins, CI/CD, Continuous Integration, Continuous Deployment, Linux Administration, Nginx, Reverse Proxy Configuration, Git, GitHub, Infrastructure Management, Deployment Automation, Build Automation, Cloud Computing, Production Deployment, Release Management, Environment Configuration, Application Monitoring, Linux Troubleshooting, Deployment Management, Server Management, Production Support, Automation Pipelines, Scalable Systems, Postman (API Testing)
- **Cloud & DevOps Tools** — AWS, Kubernetes, Shell Scripting
- **Frontend Development** — React.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Responsive Web Design
- **Backend & Database** — REST APIs, PostgreSQL, DBMS, Data Modeling, Python, Java
- **Data & Analytics** — Big Data Technologies, Data Visualization, Machine Learning, AI Fundamentals

CERTIFICATES

- CDAC PG Diploma - Big Data Analytics 
- Docker Essentials 
- Power BI Basics 
- CI/CD Fundamentals 
- Python Programming 
- Flask Python 
- SQL Fundamentals 

INTERESTS

- Reading
- Coding
